

City of King Fats, Oils and Grease Control Program Residential Fats, Oils and Grease Control

Pouring Fats, Oils and Grease down your drain can result in build ups of grease in City sewer lines which can result in Sewer Overflows.

Please help the City of King to reduce sewer overflows by properly disposing of Fats, Oils and Grease and keeping these items out of the City sewer system. By using best practices to keep grease out of the sewer system you are also saving your household from plumbing services calls to remove grease from your homes sewer service lateral.
